

Account Portal

Customizable quick registration portal

The easy way for users to keep their profile information safe and current to ensure accurate delivery of notifications.

A continuing challenge facing organizations is keeping the corporate contact database up to date. Employees can change roles, responsibilities and locations frequently, making it hard to keep contact information current. Contractors, temporary workers and guests may also need to be notified, so their contact information needs to be captured and maintained. By providing an easy way for stakeholders to enter and update their own information, companies can reduce the administrative burden of collecting information and increase the accuracy of the database.

Account Portal is a customizable, Web-based portal, hosted by OnSolve™, that provides organizations with a simple, intuitive method for users to enter and maintain their profile information. It eliminates the need for integration into complicated HR and ERP back-end systems, providing an uncomplicated and straightforward mechanism for students, employees, visitors and vendors to receive important organizational information that may affect them, whether on or off the grounds of your facility.

Account Portal provides:

-  A Web-based portal to allow users to update information from any Internet-enabled computer
-  Customization to fit the unique needs of each organization
-  Secure login and authentication lets users manage passwords and comply with security guidelines
-  Consistent formatting of data, no matter who enters it
-  Choice between required and non-required fields
-  Data validation of fields to reduce typographical errors

OnSolve:

Always On. Solving Problems.

OnSolve is the market leader in real-time, mass notification and collaboration solutions used by the world's largest organizations. The OnSolve suite of critical communication tools is a key component of effective business continuity, emergency response, IT alerting, and security programs around the globe.

Seamless database sharing with Quick Alert

Contact data entered with DataSync automatically augments that entered with Account Portal

Note that all features are not available in every configuration. Please contact a sales person to determine the best feature set for your organization.

The screenshot shows the MIR3 Account Portal registration form. The form is titled "Account Portal" and has three tabs: "General", "Devices", and "Subscriptions". The "General" tab is active. The form contains the following fields:

- Username: test@mir3.com
- Password: [Redacted]
- Confirm Password: [Redacted]
- Pin Number: [Redacted]
- Telephony ID: 1234567890
- First Name: Amir
- Last Name: Mousavian
- Building: A
- City: San Diego
- Facility Location: South
- Floor: 1st
- Time Zone: US:Pacific:Los Angeles

There is a "Save Page" button at the bottom right. A note at the bottom left states: "Clicking 'Save Page' will save the entire page across all tabs." A legend indicates that a red asterisk (*) denotes a "Required Field".

Users can self-register and keep their profile information updated.

Why MIR3 technology?

Safety, Continuity, Efficiency and Productivity

When an impactful event happens, key personnel must be notified and response teams mobilized. Rapid, intelligent, two-way, mass communication empowers both business leaders and public agencies to mitigate disruption while ensuring safety and sharing critical information. MIR3 provides a layer of awareness that helps monitor operations, alert responsible parties, and respond appropriately as a situation develops and is resolved, keeping personnel safe and your business or agency running smoothly around the clock.
